PROFESSIONAL SUMMARY

DevOps & Platform Engineer with strong software development background. Gazi University Computer Engineering graduate. Experienced in CI/CD, IaC, and AI model serving infrastructure.

EDUCATION

Gazi University — B.Sc. Computer Engineering

2014 – 2018 | GPA: 3.28 / 4.00

LANGUAGES

- English: B2 — Upper Intermediate

WORK EXPERIENCE

Senior DevOps Engineer — Payınış — Istanbul (2021 – Present)

Designed GitOps platform on Kubernetes (ArgoCD, Helm) reducing release cycle from 2 weeks to daily. Set up GPU cluster for ML model training and Ollama-based inference serving.

Platform Engineer — Ericsson Turkey (2018 – 2021)

Managed on-premise OpenStack cloud for 5G core network functions. Automated infrastructure provisioning with Terraform and Ansible.

PROJECTS

- GPU Cluster Autoscaler:** Kubernetes operator in Go that autoscales GPU nodes based on LLM inference queue depth. Used in production.
- Ollama Deployment Charts:** Helm charts for multi-model Ollama deployments on Kubernetes. 250 GitHub stars.
- CI/CD Pipeline Templates:** Reusable GitHub Actions and GitLab CI templates covering build, test, scan, and deploy stages.

INTERNSHIPS

Systems Intern — Türk Telekom (Summer 2017)

Network automation scripts in Python for BGP route management.

Linux Admin Intern — TÜBİTAK ULAKBİM (Summer 2016)

Maintained HPC cluster and batch job scheduling with SLURM.

TECHNICAL SKILLS

Kubernetes, Docker, Terraform, Ansible, AWS, GCP, Azure, Go, Python, Prometheus, Grafana, ArgoCD, Helm, Linux

AI & MACHINE LEARNING

AI infrastructure: Deployed and managed Ollama multi-model serving on GPU Kubernetes cluster. Set up MLflow model registry and Seldon Core serving infrastructure. Experience with vLLM, TGI (Text Generation Inference), and NVIDIA Triton.
