PROFESSIONAL SUMMARY

Data Scientist and ML Engineer from Izmir Institute of Technology. 2 years of industry experience with focus on NLP, time series forecasting, and MLOps.

EDUCATION

Izmir Institute of Technology (IYTE) — B.Sc. Computer Engineering

2017 – 2021 | GPA: 3.62 / 4.00 — Ranked 2nd in department

LANGUAGES

- English: C1 — Advanced (IELTS 7.0)
- Chinese: A1 — Beginner (HSK 1)

WORK EXPERIENCE

Data Scientist — Turkcell Technology — Istanbul (2022 – Present)

Built churn prediction model reducing annual churn by 8% (saving ~€2M). Deployed NLP pipeline for customer complaint categorization (BERT, Turkish). Maintained MLflow-tracked experiment pipeline.

ML Research Intern → Junior ML Engineer — Vestel Electronics R&D; (2021 – 2022)

Anomaly detection in TV manufacturing sensor data using LSTM autoencoders. Reduced defect escape rate by 12%.

PROJECTS

- Turkish BERT Sentiment API:** Production-ready FastAPI service wrapping BERTurk for multi-class sentiment analysis. Docker + K8s. 190 GitHub stars.
- Energy Demand Forecasting:** LSTM + Prophet hybrid model for 24h electricity demand forecast. Kaggle bronze medal.
- AutoML Pipeline Framework:** Lightweight Python AutoML library comparing 10 classifiers with automated feature engineering. 95 GitHub stars.

INTERNSHIPS

Data Science Intern — Vestel Electronics (Summer 2020)

Predictive maintenance model for production line machinery.

Research Intern — IYTE AI Lab (Summer 2019)

Medical image segmentation using U-Net for chest X-ray analysis.

TECHNICAL SKILLS

Python, PyTorch, scikit-learn, HuggingFace, MLflow, FastAPI, PostgreSQL, Docker, Kubernetes, PySpark, SQL, Tableau

AI & MACHINE LEARNING

Strong AI background: NLP (BERT, GPT fine-tuning), time series, anomaly detection, computer vision. Experience with LLM APIs (OpenAI, Cohere) and RAG architectures. Completed DeepLearning.AI NLP Specialization and MLOps Specialization.
