PROFESSIONAL SUMMARY

Full-Stack Developer with 4 years of experience, specializing in backend systems and cloud infrastructure. Trilingual with strong international project exposure.

EDUCATION

Istanbul Technical University (ITU) — B.Sc. Software Engineering

2015 – 2019 | GPA: 3.52 / 4.00

LANGUAGES

- English: C1 — Advanced (IELTS 7.5)
- French: B2 — Upper Intermediate (DELF B2)
- Spanish: A2 — Elementary

WORK EXPERIENCE

Backend Engineer — Peak Games — Istanbul (2021 – Present)

Designed player matchmaking service in Node.js handling 500K concurrent sessions. Integrated AWS SageMaker for churn prediction model deployment.

Full-Stack Developer — Logo Software (2019 – 2021)

Developed ERP module extensions in Java Spring Boot and Angular. Automated CI/CD pipelines reducing deployment time from 4h to 20 min.

PROJECTS

- MultiLang NLP Benchmark:** Benchmark suite comparing GPT-4, Claude, and Mistral on multilingual tasks. Published on arXiv.
- E-Commerce Price Tracker:** Python scraper + FastAPI backend + React dashboard tracking 50K+ products.

INTERNSHIPS

Cloud Infrastructure Intern — Vodafone Turkey (Summer 2018)

Automated VM provisioning scripts using Terraform and Ansible.

Backend Intern — Insider (Summer 2017)

Built A/B testing analytics dashboard with Python and Elasticsearch.

Data Intern — TÜBİTAK BİLGEM (Winter 2017)

Processed NLP datasets for Turkish government document classification.

TECHNICAL SKILLS

Node.js, Java, Spring Boot, Python, AWS, Terraform, Docker, PostgreSQL, Elasticsearch, Angular, React

AI & MACHINE LEARNING

AI: Deployed AWS SageMaker churn model. Published multilingual LLM benchmark paper. Familiar with Hugging Face pipelines and prompt engineering techniques.
